

## Press Release

---

**Green light for Croatia: The country's largest wind farm, RP Global's Danilo – Velika Glava, Bubrig and Crni Vrh, is now in operation. The wind farm has successfully completed its testing period.**

Šibenik/Vienna, June 5th, 2014 – RP Global's wind farm Danilo is now supplying energy to the grid. The 70 million Euro project strongly improves Croatia's carbon footprint by supplying approximately 25.000 households with clean electricity and reducing yearly greenhouse gas emissions by 33.300 tons of CO<sub>2</sub>-equivalent.

"With the use of cutting-edge technology, this wind farm is designed and built according to the strictest criteria of environmental protection", states Bojan Rešćec, RP Global's Country Manager for Croatia, who was responsible for the project's development and implementation. Danilo will boost Croatia's production of wind energy by 20 percent.

### **About Danilo**

The Danilo wind farm is situated about 15 km from the Adriatic Sea and the town of Šibenik. It consists of 19 Enercon E-82 turbines with a total installed capacity of 43.7 MW, generating approximately 100 GWh of electricity per year. Financing was provided by the IFC and Unicredit Vienna, as well as Zagrebačka Banka.

### **Outlook**

RP Global is about to start construction of its second wind park in Croatia – the 34.2 MW Rudine project near Dubrovnik, jointly developed with Croatian wind pioneer Adria Wind Power. Construction will start in summer 2014, financing is arranged with the IFC and Unicredit.

Subsequently, RP Global is expecting to partner up with local and international co-investors, who are looking for long-term, attractive infrastructure investments in the region.

### **About RP Global Group**

RP Global is an independent power producer with over 25 years of experience in the renewable energy sector. As a developer, investor and operator, RP Global's focus lies on hydro and wind energy projects. More than 35 power plants, both wind and hydro, have been developed and constructed so far, while 17 projects with a total capacity of 255 MW are currently in operation or under construction.

RP Global is engaged in several successful partnerships with institutions such as the Marguerite Fund and the Bank of Georgia, and has worked successfully with the EBRD, the IFC, PKO, Unicredit, BES and other multilateral/international banks.

Croatia, France and Poland (wind), as well as Portugal, Chile, Peru and Georgia (hydro) are among the countries of operation, while the company's headquarters are based in Vienna, Austria.
